VL4000 SPOT

Every aspect of the Vari-Lite VL4000 Spot luminaire has been designed with performance in mind using a Philips 1200W lamp to produce 33,000 lumens in standard mode (25,000 studio mode) and high resolution optics to ensure remarkable center-to-edge focusing, with a 5:1 zoom that covers an amazing 9 to 47 degrees without sacrificing output or clarity.

The VL4000 Spot also features dual rotating gobo wheels, dual animation wheels, the chromatically tuned Dichro*Fusion effect, a four-blade shutter system and mechanical iris. But if that wasn't enough, an independent prism with divergence control and variable frost are also implemented into the luminaire.
